

JOBST® LOWER LIMB COMPRESSION GARMENTS

DEFY GRAVITY

JOBST® Medical Grade, Ready-To-Wear garments with graduated compression help to improve blood flow and reduce oedema

What type of compression does my patient need?

1 Select the required compression

CCL 1: 15-20 mmHg

- Tired aching legs
- Minor ankle, leg and foot swelling
- Minor varicose veins during pregnancy
- Long distance travel

CCL 2: 20-30 mmHg

- Tired aching legs
- Moderate to severe varicose veins during pregnancy
- Post vein surgery/post sclerotherapy
- Moderate tendency of oedema
- Superficial thrombophlebitis
- Helps prevent recurrence of ulcerations

CCL 3: 30-40 mmHg

- Severe varicose veins
- Lymphatic oedema
- Post vein surgery/post sclerotherapy
- Venous ulcers
- Manages manifestations of Post Thrombotic Syndrome (PTS), Chronic Venous Insufficiency CVI/CVD
- Aids in prevention of thrombotic syndrome

JOBST® medical legwear should not be worn and is contraindicated for the following conditions:

- Ischemia (eg. Advanced arterial disease)*
- Uncontrolled congestive heart failure
- Untreated septic phlebitis
- Phlegmasia cerulea dolens

*As part of a comprehensive assessment, a Doppler Ultrasound is used in the vascular screening process to clarify the vascular aetiology. A hand-held Doppler will assist in determining the degree, if any, of arterial disease. Using the Doppler the Ankle/Brachial Index (ABPI) can be calculated.

2 Select garment style

Some considerations when selecting the most appropriate style for your patient:

- Indication being treated/managed
- Lifestyle, mobility and age
- Ability to don and tolerate level of compression
- Skin Integrity
- Open toe or closed toe requirements
- Maternity Style only available in JOBST® Maternity Opaque
