

# ARE ALL ADJUSTABLE VELCRO COMPRESSION DEVICES THE SAME?

DEFY GRAVITY

New research<sup>1</sup> confirms the effectiveness of Adjustable Velcro Compression Devices (AVCD) in healing Venous Leg Ulcers (VLUs) and highlights **JOBST® FarrowWrap®**.

A prospective cross over study which involved 50 patients with a VLU aimed to compare 4-layer compression bandages (4-LCB) and AVCD. Patients received our AVCD solution, JOBST FarrowWrap, or a 4-LCB system in the treatment of VLUs in the community setting. Efficacy, cost effectiveness and user satisfaction, both patients and nurses were assessed.

## RESEARCH FINDINGS:

Compression therapy using JOBST FarrowWrap (AVCD) is as effective as using 4-LCB in healing VLUs in the community setting.

### PATIENT SATISFACTION

**90%** of patients valued JOBST FarrowWrap due to the ease of attending self-hygiene, whilst 85% appreciated that it enabled them to wear their usual shoes. Thus, potentially reducing the risk of falls.

### COST EFFECTIVENESS

**25% REDUCTION** in costs when treating VLU with JOBST FarrowWrap compared to 4-LCB.

### APPLICATION TIME

**43% FASTER** using JOBST FarrowWrap compared to 4-LCB.

### PREFERENCE

**80%** of nurses valued JOBST FarrowWrap for its benefits when considering occupational safety and health issues.

# JOBST® FarrowWrap®

Easy-to-attach VELCRO® brand tabs support easy donning and doffing.

Easy Donning

Short-stretch technology provides low resting and high working pressures to enhance lymphatic and venous return.

Short Stretch Technology

VELCRO® brand hook & loop system allows patients to respond better to fluctuating oedema by simply tightening or loosening the wrap.

Adjustable

Discreet design that's less bulky than multi-layer bandaging and can be worn under normal clothing.

Low Profile Design

## JOBST® Hybrid Liner

## JOBST® FarrowWrap® Foot Piece

The JOBST foot piece can provide compression to the foot and is available in LITE, STRONG, or CLASSIC fabric.

The Farrow Hybrid Liner (in the image above) is a patented compression garment providing 20-30 mmHg compression in the foot and up to the ankle only. This enables the patient to be able to wear their own shoes.
