

JOBST[®] soSoft[®] 8-15mmHg Compression sock

Essity is excited to announce a new range of Ready-to-Wear compression socks.

JOBST[®] soSoft compression socks provide graduated compression to help support circulation and are an integral part of a skin tear protocol, helping with prevention and treatment. Compression therapy should be considered if the wound is on the lower leg. Before applying compression, a full leg assessment should be carried out.

With gentle compression of 8-15mmHg, JOBST[®] soSoft compression socks can help tired and achy legs, are suitable for longer periods of sitting and standing and provide relief from minor oedema.

JOBST soSoft compression socks are available in a stylish ribbed pattern, in Black and Sand colours
