

# NO 40 SORBACT® CLINICAL CASE

Leg ulcers

## WOUND TYPE

Leg ulcers

## PRODUCT

Sorbact® Superabsorbent

## COUNTRY/LOCATION

Finland

## TREATMENT PERIOD

21 days

## THE PATIENT

89 year old man suffering from hypertension, with a long history of leg ulcers. The wound situation worsened due to an allergic reaction to Kefexin, causing ulcers and vesicles on both legs. Strong swelling in both lower limbs with heavy exudate.

## THE TREATMENT

Previous treatment with silver dressings without sufficient effect. Changed to Sorbact® Superabsorbent with focus on managing the exudate and lowering the bioburden. Dressings changed every 3 days.
